## NOTE TO EQUIPMENT OWNER:

Please read this Owner’s Information Manual carefully before installing and using this appliance and keep this manual for future reference.

For your convenience, please record the model and serial numbers of your new equipment in the spaces provided. This information, along with the installation data and dealer contact information, will be helpful should your system require maintenance or service.

### A NOTE ABOUT SAFETY

Any time you see this symbol △ in manuals, instructions and on the unit, be aware of the potential for personal injury. There are three levels of precaution:

- **DANGER** identifies the most serious hazards which will result in severe personal injury or death.
- **WARNING** signifies hazards that could result in personal injury or death.
- **CAUTION** is used to identify unsafe practices which could result in minor personal injury or product and property damage.
- **NOTE** is used to highlight suggestions which will result in enhanced installation, reliability, or operation.

#### WARNING

**PERSONAL INJURY, DEATH AND / OR PROPERTY DAMAGE HAZARD**

Failure to follow this warning could result in personal injury, death or property damage.

Improper installation, adjustment, alteration, service, maintenance, or use can cause explosion, fire, electrical shock, or other conditions which may cause personal injury or property damage. Consult a qualified installer, service agency, or your distributor or branch for information or assistance. The qualified installer or service agency must use factory-authorized kits or accessories when modifying this product.

Read and follow all instructions and warnings, including labels shipped with or attached to unit before operating your new air conditioner.

---

### GENERAL

The high wall fan coil unit provides quiet, maximum comfort. In addition to cooling and/or heating, the high wall fan coil unit matched with an outdoor condensing unit filters and dehumidifies the air in the room to provide maximum comfort.

**IMPORTANT:** The high wall fan coil unit should be installed by authorized personnel only; using approved tubing and accessories. If technical assistance, service or repair is needed, contact the installer. The high wall fan coil unit can be set up and operated from the remote control (provided). If the remote is misplaced, the system can be operated from the “Auto” setting on the unit.

#### Operating Modes:

The high wall fan coil unit has five operating modes:

- Fan only
- Auto
- Heating (heat pump models only)
- Cooling
- Dehumidification (DRY)

**Fan Only**

In Fan Only mode, the system filters and circulates the room air without changing room air temperature.

**Auto**

In Auto mode, the system automatically cools or heats the room according to the user-selected set point.

**NOTE:** Auto mode is recommended for use on Single Zone applications only. Using Auto changeover on multi-zone applications could set an indoor unit to STANDBY mode, indicated with two dashes (--) on the display, which will turn off the indoor unit until all the indoor units are in the same mode (Cooling or Heating). Heating is the system’s priority mode. Simultaneous Heating and Cooling is not allowed.

**Heating**

In Heating mode, the system heats and filters the room air.

**Cooling**

In Cooling mode, the system cools, dries and filters the room air.

**Dehumidification (DRY)**

In Dehumidification mode, the system dries, filters and slightly cools the room air temperature. This mode prioritizes air dehumidification but it does not take the place of a dehumidifier.

#### Wireless Remote Control

The remote control transmits commands to set up and operate the system. The control has a window display panel that displays the current system status. The control can be secured to a surface when used with the mounting bracket provided.

#### Wired Remote Control (Optional)

#### 24V Interface (Optional)

Allows the control of the Ductless System with a third party thermostat.
PART NAMES

- Indoor
  1. Front panel
  2. Air Inlet
  3. Display
  4. Air Filter
  5. Right–Left airflow grille
  6. Up–Down air flow louver
  7. Interconnecting tubing
  8. Control and power wiring to indoor unit
  9. Service valves
  10. Remote control
  11. Remote control bracket
  12. Self–tapping screws

- Outdoor

Fig. 1 — Indoor/Outdoor Unit

Fig. 2 — Remote Controller
FUNCTION BUTTONS
Before you begin using your new air conditioner, make sure to familiarize yourself with the remote control. The following is a brief introduction to the remote controller.

1. **ON/OFF Button 🌈**
   This button turns the unit ON and OFF

2. **UP Button ⇑**
   Press this button to increase the set temperature or timer setting hours.

   **DOWN Button ⇑**
   Push this button to decrease the set temperature of timer setting hours.

   **NOTE:**
   - When the unit operates in heating mode with a set temperature of 62°F, pressing the button twice will activate 46°F degree heating. The indoor unit display shows FP.

3. **FAN Button 🎨**
   Used to select the fan speed in four steps: HIGH → MED → LOW → AUTO

   **NOTE:**
   - Hold down the FAN button for at least two seconds to activate/cancel Silent mode. Due to low frequency operation of the compressor, it may result in insufficient cooling and heating capacity.
   - Press the FAN button, MODE button, ON/OFF, or ECO button to cancel the Silent function.

4. **FAN Button 🎨**
   Used to select the fan speed in four steps: AUTO → LOW → MED → HIGH
   You cannot switch the fan speed in AUTO or DRY mode.

   **NOTE:** Hold down this FAN button for at least two seconds to activate/cancel Turbo mode. The Turbo function enables the unit to reach the preset temperature at cooling or heating operation in the shortest time (if the indoor unit does not support this function, no corresponding operation happens when pressing this button).

5. **SWING Button 🎨**
   (for RG58B/BGEU1 and RG58E/BGEFU1 models only)
   Used to stop or start horizontal louver movement or to set the desired up/down air flow direction. The louver can be move at a range of about 6° each time the button is pressed. If the button is pressed for more than two seconds, the louver will swing up and down automatically.
   (for RG58E4/BGEFU1 models only).
   Used to stop or start horizontal louver movement. Hold the SWING button down for two seconds to start/stop vertical louver movement.

6. **SET Button 🎨**
   Used to initiate the following functions in the sequence below, in conjunction with the and buttons.

   Timer on – Timer Off – Self Clean* – Fresh* – Sleep* – Follow me*

   Press the SET button to select the desired function, the selected symbol will flash on the display area, then press the or button to confirm.

   **SLEEP Function 🌌**
   Maintains the most comfortable temperature and saves energy. This function is available on COOL, HEAT, or AUTO mode only.
   For further details, see Sleep Operation in the User’s Manual.

   **FRESH Function 🌌 (optional)**
   When the FRESH function is initiated, the Ionizer/Plasma Dust Collector (depending on models) is energized and helps to remove pollen and other impurities from the air.

   **SELF CLEAN Function 🌌 (optional)**
   In the SELF CLEAN mode, the unit automatically cleans and dries the evaporator and keeps it fresh for the next operation.

   **Follow Me Function 🌌 (optional)**
   When the Follow Me function is activated, the remote display is the actual temperature at its location. The remote control will send this signal to the unit every three minutes until the FOLLOW ME button is pressed again.
7. **ECO Button**

The ECO button is used to enter the energy efficient mode. In cooling mode, press this button, and the remote controller automatically adjusts the temperature to 76°F. The fan speed switches to Auto to save energy if the set temperature is below 76°F. If the set temperature is between 76°F and 86°F, press the ECO button, and the fan speed changes to Auto. The set temperature will remain unchanged.

**NOTE:** Pressing the ON/OFF button, modifying the mode, or adjusting the set temperature to below 76°F stops the ECO operation. In ECO operation, the set temperature should be at least 76°F or it may result in insufficient cooling. Press the ECO button again to stop it if the temperature is uncomfortable.

8. **MODE Button**

Press this button to modify the unit mode in the following sequence:

```
AUTO ➔ COOL ➔ DRY ➔ HEAT ➔ FAN
```

**NOTE:** Do not select HEAT mode if the unit is cooling only type. Heat mode is not supported by this type of unit.

9. **DO NOT DISTURB Button**

Press the Do Not Disturb button to turn off the indoor screen display and to turn off the Air conditioner buzzer. The fan speed shifts to low, which creates a comfortable and quiet environment. Press the button again to cancel this function. In the DO NOT DISTURB mode, the display illuminates for ten seconds while adjusting the mode, set temperature, fan speed, etc.

10. **Lock Function**

Press button ECO and simultaneously to lock or unlock the keyboard.

**NOTE:** New Remote Controller starting on production of week 1 year 2018 (serial number V180140000). For advanced functions, refer to the RG58F1(2H)/BGEFU1 Wireless Remote Controller’s Service Manual.
DISPLAY PANELS

Fig. 4 — Display Panel

Remote LCD Screen Indicators

- **MODE display**
  - Displays the current mode, including:
    - AUTO
    - COOL
    - DRY
    - HEAT
    - FAN

- **ON/OFF display**
  - Appears when the unit is turned on, and disappears when it is turned off.

- **TIMER ON display**
  - Displays when TIMER ON is set.

- **TIMER OFF display**
  - Displays when TIMER OFF is set.

- **ECO display**
  - Not available for this unit.

- **Battery display**
  - Low battery detection.

- **SLEEP display**
  - Displays when SLEEP function is activated.

- **FOLLOW ME display**
  - Indicates that the FOLLOW ME function is on.

- **FRESH display**
  - Not available for this unit.

- **SILENT display**
  - Displays when silence function is activated.

- **Temperature/Timer display**
  - Displays the set temperature by default, or timer setting when using TIMER ON/OFF functions.
    - Temperature range: 62-86°F
    - Timer setting range: 0-24 hours
  - This display is blank when operating in FAN mode.

Fig. 5 — Unit Display
REMOTE CONTROL

Fig. 6 — Remote Control

⚠️ CAUTION

EQUIPMENT DAMAGE HAZARD
Failure to follow this caution may result in equipment damage.
Handle the control with care and avoid getting the control wet.

IMPORTANT: The remote control can operate the unit from a distance of up to 26 ft. (8 m) as long as there are no obstructions.
When the timer function is used, the remote control should be kept in the vicinity of the fan coil (within 26 ft. / 8 m).
The remote control can perform the following basic functions:
• Turn the system ON and OFF
• Select operating mode
• Adjust room air temperature set point and fan speed
• Adjust right–left airflow direction
Refer to the Remote Control Function section for a detailed description of all the capabilities of the remote control.

Battery Installation
Two AAA 1.5v alkaline batteries (included) are required for operation of the remote control.
To install or replace batteries:
1. Slide the back cover off the control to open the battery compartment.
2. Insert batteries. Follow the polarity markings inside the battery compartment.
3. Replace the battery compartment cover.

NOTE:
1. When replacing batteries, do not use old batteries or a different type battery. This may cause the remote control to malfunction.
2. If the remote is not going to be used for several weeks, remove the batteries. Otherwise battery leakage may damage the remote control.
3. The average battery life under normal use is about 6 months.
4. Replace the batteries when there is no audible beep from the indoor unit or if the Transmission Indicator fails to light.
5. When batteries are removed, the remote control erases all programmed settings. The control must be reprogrammed after insertion of new batteries.

Remote Control Operation – Quick Start

NOTE: When transmitting a command from the remote control to the unit, be sure to point the control toward the right side of the unit. The unit confirms receipt of a command by sounding an audible beep.

1. Turn the unit on by pushing ON/OFF.
2. If there is a preference for °C rather than °F (default), press and hold the increase ▲ and decrease ▼ temperature set point buttons together for approximately 3 seconds.
3. Select the desired mode by pushing the mode button.

Fig. 7 — Modes

4. Select the temperature set point by pointing the control toward the unit and pressing the increase/decrease temperature set point buttons until the desired temperature appears on screen.
5. Select the desired fan speed by pressing FAN.

NOTE: If the unit is operating in DRY or AUTO mode, the fan speed will be automatically set.

6. Set the airflow direction. When the unit is turned on, the Up–Down Airflow louver default to the cooling or heating position. The user can adjust the horizontal Up–Down airflow louver position by pushing DIRECT or have continuous louver movement by pressing SWING.

Manual Operation
If the remote control is lost, damaged, or the batteries are exhausted, MANUAL can be used to run the unit.
When MANUAL is pressed once, the AUTO mode takes affect (heat or cool). When this button is pressed twice, the system enters the TEST mode and runs for 30 minutes in the COOLING mode (it will run in the AUTO mode afterward). When pressed three times, the system turns OFF.

Fig. 8 — Manual Button

The set conditions of manual operation are as follows:
• Preset set point: 76°F (24°C)
• Fan speed: AUTO
• Discharge air direction: Pre–set position based on operation in “Cool” or “Heat” mode.
REMOTE CONTROL FUNCTIONS

Pressing On/Off
When the air conditioner is not in operation, the remote control displays the last set point and mode.

- Press ON/OFF to start the unit.
  - The unit starts in the last operating mode and set point. The ON/OFF indicator appears.
- Press ON/OFF to stop the unit.
  - All the indicator lights on the unit go out, and the remote control displays the set point and mode.

NOTE: If ON/OFF is pressed too soon after a stop, the compressor will not start for 3 to 4 minutes due to the inherent protection against frequent compressor cycling. The unit only emits an audible beep when the signals are received correctly.

Selecting an Operating Mode
Use OPERATING MODE to select one of the available modes.

Setting the Room Temperature Set Point
Press the increase temperature set point ▲ and decrease ▼ buttons to raise or lower the temperature.

The unit confirms the signal receipt with a beep and the value of the set temperature appears on the display and changes accordingly. The temperature can be set between 62°F (17°C) and 86°F (30°C) in increments of 1°F or 1°C.

NOTE: In the COOLING mode, if the temperature selected is higher than the room temperature, the unit will not start. The same applies for the HEATING mode if the selected temperature is lower than the room temperature.

Selecting the Fan Speed

![Fan Speeds](image)

Fig. 10 — Fan Speeds

The fan speed can be selected by pressing FAN.

NOTE: When the unit is on, the fan runs continuously in cooling or heating. When in heating, there might be situations where the fan will slow down or shut off to prevent cold blow.

Selecting the Up–Down Louver Position
To optimize comfort, the Up–Down louver operates in a preset range (see Fig. 11).

![Fig. 11 — Louver Position](image)

Selecting Right–Left Direction of the Louver
The right-left louvers can be adjusted manually to direct the airflow to achieve optimal comfort in the space.

![Fig. 12 — Louver](image)

Timer Function
TIMER ON (to start the unit) and TIMER OFF (to stop the unit) can be used separately or together.

**Timer ON only**
This function allows the unit to start automatically at the set time. The TIMER ON function can be set while the unit is on or off.

**UNIT ON**

a. Press TIMER ON to initiate the auto-on time sequence.
   The set time is displayed in the remote control display. Every time TIMER ON is pressed, the time increases by 30 minutes, up to 10 h. It increases by 60 minutes, afterwards, until the time setting reaches 24 h.

b. When the TIMER ON is set, the TIMER light on unit illuminates. The unit continues to run at the set time.

**UNIT OFF**

a. Set the timer described in the UNIT ON section.

b. The unit starts at the set time.

Adjust the TIMER ON settings to 0.0 to cancel this option.
Timer OFF only
This function allows the unit to stop automatically at the set time. The timer can be set while the unit is on or while it is off.

UNIT ON
a. Press TIMER OFF to initiate the auto−off time sequence. The set time appears on the remote control display. Every time TIMER OFF is pressed, the time increases by 30 minutes, up to 10 h. It increases by 60 minutes, afterwards, until the time settings reach 24 h.
b. When the TIMER OFF is set, the timer light on the unit illuminates and the unit turns off automatically at the set time.

UNIT OFF
a. Set the TIMER off as described in the UNIT ON section. The TIMER display on the unit illuminates and the unit remains off.
b. Adjust the TIMER ON settings to 0.0 to cancel this option.

Timer ON and Timer OFF
Use both functions to program the unit to turn on and shut off at specified times.

UNIT OFF
a. Set TIMER ON as previously described.
b. Set TIMER OFF as previously described. The unit starts automatically at the set TIME ON and turns off at the set TIME OFF.

UNIT ON
a. Set TIME OFF as previously described.
b. Set TIME ON as previously described. The unit turns off automatically at the set TIME OFF and turns on at the set TIME ON.

Sleep Mode
SLEEP mode is used to conserve energy and can be used when the unit is in the COOL, HEAT or AUTO mode only.

Cool Mode
a. Push SLEEP. After 1 hour the set point raises by 1.8°F (1°C). After another hour, the set point raises by another 1.8°F (1°C) and the fan runs in a slow speed. The unit shuts off 5 hours after setting the SLEEP mode. The SLEEP mode cancels if either “Mode”, “TEMP”, “Fan”, “Timer”, or “On/Off” on the remote control is pressed.

Heat Mode
- Same as the COOLING mode however the set points are lowered by 1.8°F (1°C).

TURBO Mode
Use the TURBO mode to cool or heat the room rapidly.

- Press TURBO. An audible “beep” is heard if the indoor unit supports this function. The fan runs on super high speed. The TURBO mode terminates automatically 20 minutes after pushing TURBO mode. It can be terminated immediately by selecting the TURBO mode again. When the TURBO mode is terminated, the unit reverts to the original setting.

Self Clean Mode
Press “Self Clean” to activate or deactivate the self−cleaning function. Under this function, the air conditioner automatically cleans and dries the evaporator. The cleaning cycle takes 30 minutes, after which the unit turns off automatically. Pressing SLC on the middle of the cycle cancels the operation and turn off the unit. This function can be activated only on COOL or DRY mode.

Follow Me Mode
Press Follow Me to activate or deactivate this function. Under this setting, the temperature that appears in the remote control is the actual temperature at its location. The remote control sends this signal to the air conditioner every 3 minutes. This function is not available for DRY and FAN modes.

Freeze Protection Mode
Press “FP” for approximately 2 seconds to activate or deactivate the freeze protection mode (heating set back). The indoor unit displays “FP”.

NOTE: This function is only available in the heating mode.
Under this function, the unit operates at high fan speed and the coil temperature automatically sets to 46°F (8°C). This mode can also be deactivated by pressing “On/Off”, “Sleep”, “Mode”, “Fan”, or either “TEMP”.

Silence Mode
Press SLC to activate of deactivate the SILENCE Mode. Under this function, the compressor operates at low frequency and the indoor unit produces a faint breeze, which reduces the noise to the lowest level. Due to low the frequency operation of the compressor, it may result in insufficient cooling and heating capacity.

LED Light
Press LED to turn the display light on and off.

Resetting the Remote Control
If the batteries in the remote control are removed, the current settings will be cancelled and the control returns to the initial settings and will be in standby mode. Push ON/OFF to activate.

Time Delay
If On/Off is pressed too soon after a stop, the compressor will not start for 3 to 4 minutes due to the inherent protection against frequent compressor cycling. The unit only emits an audible beep when the signals are received correctly.

Heating Features
If the unit is in HEATING mode, there is a delay when the fan starts. The fan starts only after the coil is warmed up to prevent cold blow.

Auto Defrost Operation
In HEATING mode, if the outdoor coil is frosted, the indoor fan and outdoor fan turns off while the system removes the frost on the outdoor coil. The system automatically reverts to normal operation when frost is removed from the outdoor unit.

Auto Start
If the power fails while the unit is operating, the unit stores the operating condition, and it will start operation automatically under those conditions when the power is restored.
CLEANING, MAINTENANCE, AND TROUBLESHOOTING

**CAUTION**

**EQUIPMENT DAMAGE/OPERATION HAZARD**
Failure to follow this caution may result in equipment damage or improper unit operation.
Operating the system with dirty air filters may damage the indoor unit and could cause reduced cooling performance, intermittent system operation, frost build-up on indoor coil or blown fuses.

**Periodic Maintenance**
Periodic maintenance is recommended to ensure proper operation of the unit. Recommended maintenance intervals may vary depending on the installation environment, e.g., dusty zones, etc. Refer to Table 1.

**CAUTION**

**CUT HAZARD**
Failure to follow this caution may result in personal injury.
The coil fins are very sharp. Use caution when cleaning.
Always wear safety protection.

**Cleaning the Coil**
Clean the coil at the beginning of each cooling season, or when necessary. Use a vacuum cleaner or a long-bristle brush to avoid damage to the coil fins.

**Air Filters**
Remove and clean the air filters once a month.

**NOTE:** If air filters show signs of excessive wear or are torn, they must be replaced. Contact your local dealer for replacement filters.

1. Open front panel on unit.
2. Pull filters down to remove.
3. Vacuum filters.
4. Clean with warm water.
5. Shake filter to remove excess water and dry thoroughly.
6. Replace filter by sliding into rack until filter snaps in place.
7. Close front panel on unit.

**CAUTION**

**EQUIPMENT DAMAGE HAZARD**
Failure to follow this caution may result in equipment damage.
When cleaning the front panel, do not use water hotter than 105°F (40.6°C) and do not pour water onto the fan coil. Do not use abrasive or petroleum based cleaners as they may damage the front panel.

**Indoor Unit Front Panel**
To clean the front panel on the indoor unit, wipe the outside with a soft, dry cloth.

**Preparing for Extended Shutdown Period**
Clean the filters and reposition them in the unit. Operate the unit in Fan only mode for 12 hours to dry all internal parts.
Turn main power supply off and remove batteries from the remote control.

**System Operation Recommendations**
The items outlined in the following list help to assure proper system operation:
- Replace both remote control batteries at the same time.
- Point the remote control toward the unit display panel when transmitting a command.
- Keep doors and windows closed while unit is operating.
- Contact an authorized service representative if a problem arises that cannot be easily resolved.
- Do not perform cleaning or maintenance activities while the unit is on.
- Keep the display panel on the unit away from direct sunlight and heat as this may interfere with remote control transmissions.
- Do not block air intakes and outlets on the indoor or outdoor units.

**Energy Saving Recommendations**
The following recommendations will add greater efficiency to the ductless system:
- Select a comfortable thermostat setting and leave it at chosen setting. Avoid continually raising and lowering the setting.
- Keep the filter clean. Frequent cleaning may be necessary depending on indoor air quality.
- Use drapes, curtains or shades to keep direct sunlight from heating the room on very hot days.
- Limit the unit’s run time by using the TIMER function.
- Do not obstruct the air intake on the front panel.
- Turn on the air conditioning unit before the indoor air becomes too uncomfortable.
