1 For All™
Programmable
Digital Thermostat

- 7 Day Programmable
- 4 Time Periods per Day
- Thermoglow™ Backlight
- One-For-All™ Technology
- Programmable Fan

- Separate Humidification and Dehumidification Terminals
- Read Outdoor Temperature With Optional Sensor
- Large, Easy To Read Display

Meets Residential California Title 24

- Use with most Air Conditioning & Heating Systems including: 1 or 2 Stage Electric Cooling & Gas Heating, Heat Pump, Electric or Hydronic Heat.

**Display**

1. **Mode Indicators**
   - Selects the operation mode of the equipment.
   - **HEAT** - indicates the heat mode.
   - **COOL** - indicates the air conditioning mode.
   - **AUTO** - indicates the system will automatically changeover between heat and cool modes as the temperature varies.
   - **OFF** - indicates the entire system is turned off.
   - **PROGRAM ON** - indicates the stored program is enabled to run. *Page 6.*

2. **Clock with Day of the Week**
   - Indicates the current time and day. This clock is also used to program the time periods. *Page 5.*

3. **Room Temperature Display**
   - Indicates the current room temperature.

4. **Desired Set Temperature**
   - Indicates desired room temperature(s). *Page 7.*
Display

5 Outside Indication
Indicates the temperature displayed is from the optional outside sensor. Page 21.

6 Morning, Day, Evening & Night Indication
Indicates the program time period. Page 9-12.

7 Setup Indication
Indicates the thermostat is in the advanced programming mode. Page 13.

8 Fan Operation Indication
  Fan On- indicates constant, continuous fan operation, (Fan On).
  When Fan On is not lit - indicates the fan will only operate when necessary to heat or to cool. Page 7.

9 Service Filter and Service Pan Indication
  Service Filter- indicates when the filter should be serviced under normal conditions. Appears after 0 - 1950 hours of blower operation (adjustable). Page 13.
  Service Pan- indicates that the condensate pan of the Evaporator Coil is full of water and needs to be checked for blockages and emptied out.

10 Locked Indication
  - appears after the right combination of buttons are pressed, rendering the buttons inoperative. Page 20.

11 Cool to Dehumidify Indication
Appears when the humidity in the space is above the Dehumidification Setpoint (page 8 step 4) and Dehumidification has been turned ON in the Advanced Setup (page 16 step 17).
During Setup & Programming:
Pressing the Up and Down buttons will modify the flashing selection.
(Represented in dark black)

Pressing the SET CLOCK button will modify the flashing selection.

Press the SET CLOCK button as above to return to normal operation.

TIP: Hold the Fan button in while pressing up or down to rapidly advance the hours in Set Clock.

This thermostat is preprogrammed from the factory to operate 1 or 2 Stage equipment without the need for further programming. To optimize the installation of this thermostat follow the instructions in the Advanced Setup section.
Select Mode

The **HEAT** setting indicates the temperature the room has to reach before the furnace will turn on to heat the room.

The **COOL** setting indicates the temperature the room has to reach before the air conditioner will turn on to cool the room.

**AUTO** will automatically select heat or cool based on room temperature demand.

**Program On** will activate the stored timer operation. (Morning, Day, Evening & Night Periods)

**OFF** indicates both heating and air conditioning systems are turned off.
Basic Operation | Temperature Control
---|---
Select Desired Temperature | In any mode, adjust the desired Set Temperature with up/down buttons.

Pressing the up/down buttons in Auto mode will adjust both the heat and cool set temperatures simultaneously. Pressing the up/down buttons in Heat or Cool modes will adjust only the heat or cool set temperature.

View Outdoor Temperature

Press the Outside button. The Outside temperature will be displayed until the Outside button is pressed again. 2 dashes appear if no outdoor sensor is connected.
Basic Operation

Press the Humidity button to enter Setup screens.

Pages 18, 20

Humidity Control

NOTE: Due to variations in environmental conditions, it is not always possible to achieve the desired humidification or dehumidification setpoint.

Press the Humidity button to enter Setup screens.

Press MODE

Press MODE

Press MODE

To leave the Humidity Control screens. If no buttons are pressed, the display will leave the Humidity Control screens after 30 seconds.

NOTE: Each step # is located at the top right corner of the display for easy reference.

Step 3 appears if step 17 on page 16 is set to "ON:")

Step 4 appears only if step 17 on page 16 is set to "ON"

NOTE: If Humidity Step #1 is set to ON, you cannot set the Dehumidify setpoint any lower than the Humidify setpoint, + 5%. When both Humidity step #1 and #3 are set to ON, the adjustable 5% differential is forced between the Humidify and Dehumidify setpoints.

NOTE: Due to variations in environmental conditions, it is not always possible to achieve the desired humidification or dehumidification setpoint.
Programming  4 Time Periods

Press the PROGRAM button to enter time period programming.

Use the back cover Programming Worksheet to help with this section.

- Select the day of week (M - Su)
- Adjust the start time for Morning.
- Adjust the cooling setpoint for Morning. (35 - 99°F)
- Adjust the heating setpoint for Morning. (35 - 99°F)

Page 9
Adjust the start time for Day.

Adjust the cooling setpoint for Day.
(35 - 99°)

Adjust the heating setpoint for Day.
(35 - 99°)

Adjust the start time for Evening.

Adjust the cooling setpoint for Evening.
(35 - 99°)
Adjust the heating setpoint for Evening.
(35 - 99°F)

Adjust the start time for Night.

Adjust the cooling setpoint for Night.
(35 - 99°F)

Adjust the heating setpoint for Night.
(35 - 99°F)
Select Yes or No to copy the previous day’s program to this day.

If Yes is selected:
Selecting Yes, then pressing mode will copy the previous day’s program and then will ask the same copy question again. If yes is selected each time, this routine will repeat.

The copy command becomes available after programming the entire previous day.

If No is selected, as in previous steps, flashing prompts for input will appear for the 4 time periods for the next day.
Advanced Setup

Before entering Advanced Setup, use the Mode button to place the unit in OFF. These steps are normally set up by the installer. Setting these values incorrectly may result in improper operation. Setup steps 1 & 2 are found in the clock set section.

1. Press the Mode button. While holding the Mode, press the Program button to enter Setup screens.

   **NOTE:** Each step # is located at the top right corner of the display for easy reference.

2. Reset the Service Filter counter to 0, to remove the icon from the display.

3. Adjust the number of hours the blower will run before the Service Filter icon appears on the display. 0 = off. (0 - 1950)

4. Select Heat Pump operation (ON) or, Gas/Electric operation (OFF).

5. Select reversing valve type, O or B. (Step 6 appears if step 5 is ON.)

Page 13
Advanced Setup

- **ON**
  - Select Electric Heat **ON** or **OFF**. (Step 7 only appears if Step 5 is set to **OFF**.)
  - **OFF**

- **Adjust the Deadband**
  - (1 - 6)
  - **db**
  - **Setup**
  - **2**

- **Adjust the minimum difference** between cooling & heating setpoints.
  - (0 - 6)
  - **d IF**
  - **Setup**
  - **9**
  - **COOL**
  - **HEAT**
  - **2**

- **Select the cycles per hour limit.**
  - d - cycles per hour limit defeated.
  - d1 - defeated 5 min. Compressor lockout.
  - (d, d1, 2 - 6)
  - **Setup**
  - **10**
  - **6 Cy**

- **Select ON for ‘Standalone’ Humidity/Fan operation.**
  - Intellistat will turn on the fan and humidifier with a humidity demand, or, Select OFF to only turn on the humidifier if in Heat or Fan and there is a humidity demand.
  - **ON**
  - **humidity**
  - **Fan On**
  - **Setup**
  - **11**
  - **Continued**
### Advanced Setup

1. **Adjust the programmable fan timer.**
   - Page 20
   - 0 - 60 minutes.
   - 0:00 = off

2. **Adjust the programmable fan start time.**
   - Step 16 appears only if step 15 is not 0:00

3. **Adjust the programmable fan stop time.**
   - Step 15 appears only if step 13 is not 0:00

4. **Select the display backlight.**
   - On, or Off after 8 seconds.

5. **Select thermostat operation in degrees Fahrenheit or Centigrade.**
Select Dehumidification Operation On or Off. Page 8, 18, 20

Step 18 appears if step 17 is set to “ON”

Select Cool to Dehumidify feature. Page 8, 18, 20

Step 19 appears only if step 17 is set to “ON”

Adjust the Maximum overshoot of the set temp. In Cool to Dehumidify Mode. Page 8, 18, 20

To Exit

* These setup steps may be accessed by pressing the Set Clock button (page 5).
About Advanced Features & Operation

🔹 COOL TO DEHUMIDIFY - The compressor will run with the fan in this mode to reduce moisture in the air (step#19). This feature will also adjust the cooling overshoot of the setpoint 0° to 5° (step#20).

🔹 DEHUMIDIFICATION SETPOINT - If your HVAC unit is equipped with a Dehumidification System and the Humidity Module has been installed, page 8,16,20, the thermostat will provide power to the Misc. terminal on the backplate of the thermostat when the Humidity in the home is below the setpoint you have chosen and, when the humidity in the home rises above the setpoint you have chosen, the Misc. terminal will be deenergized. The value for this setpoint ranges from 25% to 50%, or OFF if no dehumidification is desired or if a Dehumidification System has not been installed.

🔹 DUAL SETPOINT BEHAVIOR - The adjustable setpoint range is: 35 - 99 degrees Fahrenheit and 2 - 36 degrees Centigrade. When in the modes Heat or Cool, this adjustable range is unhampered. When adjusting any Auto mode, including programming 4 Time periods, the thermostat will not allow the Heat setpoint to get closer to the Cool setpoint than the value programmed as the minimum difference in step 9, page 14. When entering the Auto mode from Cool, the Heat and Cool setpoints will remain spread apart by the amount that they were adjusted, prior to entering Auto. For example: If the Cool setpoint was set to 80 while in the Cool mode and the Heat setpoint was adjusted to 70 while in the Heat mode, upon entering the Auto mode the Heat and Cool setpoints would be 80 and 70. Both setpoints would then move up and down together, (in this example spread by 10 degrees), by pressing the up or down buttons. To move the Heat and Cool setpoints closer together, enter the Cool or Heat mode by pressing the Mode button, then adjust the setpoint(s) closer together. Heat is limited to how close it can come to Cool by step 9, page 14.
**ELECTRIC HEAT** - Selecting Electric Heat ON, *page 14, step 7*, will cause the thermostat to turn on the fan immediately any time there is a heat demand. Since all gas furnaces control the fan, this feature should be off unless the heater is only electric.

**EMERGENCY HEAT** - Is a feature available to Heat Pump installations. To turn on Emergency Heat press in the Fan button. While holding the Fan button press the Up button for 2 seconds. The Cool setpoint display will read ‘EH’.

![Emergency Heat Control]

During Emergency Heat the thermostat will turn on the fan and the 2nd stage of heat, when there is a demand for heat, locking out the 1st stage compressor. Exiting Emergency Heat is the same as entering. During Emergency Heat only OFF and HEAT are available.

**FACTORY DEFAULTS** - If, for any reason it is desirable to return all stored settings back to the factory default settings, press the Mode button. While holding the Mode button in, press the Fan button for 5 sec. All icons will appear. Press and hold in the Fan button until **Fd** appears. This resets all factory settings. To return to normal operation, press the Mode button twice more.
About Advanced Features & Operation

- **HUMIDIFICATION SETPOINT** - If your HVAC unit is equipped with a humidification system, the thermostat will provide power to the Dehum terminal on the backplate of the thermostat when the Humidity in the home falls below the setpoint you have chosen. The value for this setpoint ranges from 25% to 50%, or OFF if no Humidity is desired or if a Humidification System has not been installed.

- **KEYPAD LOCK** - To prevent unauthorized use of the thermostat, the front panel buttons may be disabled. To disable, or 'lock' the keypad, press and hold in the Mode button. While holding the Mode button in, press the Up and Down buttons in together. The **Locked** icon will appear on the display.

To **unlock** the buttons, again press and hold the Mode button. While holding the Mode button in, press the Up and Down buttons in together. The **Locked** icon will disappear from the display.

- **MEMORY BACKUP** - In the event of a power loss, the TR7DRH will retain the stored program settings without external power or batteries.
**MINIMUM HEAT/COOL SETPOINT DIFFERENCE** - The Heat and Cool setpoints will not be allowed to come any closer to each other than the value set in Advanced Setup step # 9, on page 14. This minimum difference is enforced during Auto changeover and Program On operation.

**MULTI-STAGE OPERATION** - Control up to 2 Heat, 1 Cool Stages.

The 2nd Stage of heat is turned on when:

- **A** the 1st Stage has been on a minimum of 2 minutes
- **B** the temperature spread from the setpoint is equal to or greater than: the setpoint plus the deadband, plus 2 degrees.

<table>

<th>Dead Band</th>
<th>1st Stage turn on</th>
</tr>
</thead>
<tbody>
<tr>
<td>Cool</td>
<td>Dead Band</td>
<td>Cool Setpoint</td>
<td>1st Stage turn on</td>
</tr>
</tbody>
</table>

**OUTDOOR SENSOR (Optional Accessory)** - When connected to terminals RS+5, RS1, & RS GND on the back of the thermostat, the thermostat will read the temperature from the outdoor Sensor when asked to. This thermostat will not control to this sensor, it is only to read outside temperature. To read the temperature from the Outdoor Sensor, press the Outside button. The display will then only show Outside temperature. Pressing the Outside button will then return the display Yo normal operation. The Outdoor sensor is also used by the thermostat to compare the outside temperature to the indoor temperature for window condensation control. The Outdoor Sensor is available in a wired or wireless version. The wired sensor can be connected to the thermostat with up to 500' of 20 ga. or 300' of 18 ga. Unshielded, thermostat wire.

See the Outdoor Sensor instructions for further details.
PROGRAMMABLE FAN - If the Programmable Fan timer is set to a value other than 0:00, the fan will run for the preprogrammed amount of time, page 15, step# 12. The Programmable Fan timer will start the fan at the top of each hour. The Programmable Fan may be active even if the thermostat mode is Off. Steps 13 & 14 restrict the hours in which Programmable Fan may operate. Step# 13, page 15 is the start time and step# 14 is the stop time. Setting the times to the same setting in both steps 13 & 14 will allow Programmable Fan to operate 24 hours a day.
Warranty

One-Year Warranty - This Product is warranted to be free from defects in material and workmanship. If it appears within one year from the date of original installation, whether or not actual use begins on that date, that the product does not meet this warranty, a new or remanufactured part, at the manufacturer’s sole option, to replace any defective part will be provided without charge for the part itself; PROVIDED the defective part is returned to the distributor through a qualified servicing dealer.

THIS WARRANTY DOES NOT INCLUDE LABOR OR OTHER COSTS incurred for diagnosing, repairing, removing, installing, shipping, servicing or handling of either defective parts or replacement parts. Such costs may be covered by a separate warranty provided by the installer.

THIS WARRANTY APPLIES ONLY TO PRODUCTS IN THEIR ORIGINAL INSTALLATION LOCATION AND BECOMES VOID UPON REINSTALLATION.

LIMITATIONS OF WARRANTIES – ALL IMPLIED WARRANTIES (INCLUDING IMPLIED WARRANTIES OF FITNESS FOR A PARTICULAR PURPOSE AND MERCHANTABILITY) ARE HEREBY LIMITED IN DURATION TO THE PERIOD FOR WHICH THE LIMITED WARRANTY IS GIVEN. SOME STATES DO NOT ALLOW LIMITATIONS ON HOW LONG AN IMPLIED WARRANTY LASTS, SO THE ABOVE MAY NOT APPLY TO YOU. THE EXPRESSED WARRANTIES MADE IN THIS WARRANTY ARE EXCLUSIVE AND MANY NOT BE ALTERED, ENLARGED, OR CHANGED BY ANY DISTRIBUTOR, DEALER, OR OTHER PERSON WHATSOEVER.

ALL WORK UNDER THE TERMS OF THIS WARRANTY SHALL BE PERFORMED DURING NORMAL WORKING HOURS. ALL REPLACEMENT PARTS, WHETHER NEW OR REMANUFACTURED, ASSUME AS THEIR WARRANTY PERIOD ONLY THE REMAINING TIME PERIOD OF THIS WARRANTY.

THE MANUFACTURER WILL NOT BE RESPONSIBLE FOR:

1. Normal maintenance as outlined in the installation and servicing instructions or owner’s manual including filter cleaning and/or replacement and lubrication.
2. Damage or repairs required as a consequence of faulty installation, misapplication, abuse, improper servicing, unauthorized alteration or improper operation.
3. Failure to start due to voltage conditions, blown fuses, open circuit breakers or other damages due to the inadequacy or interruption of electrical service.
4. Damage as a result of floods, winds, fires, lightning, accidents, corrosive environments or other conditions beyond the control of the Manufacturer.
5. Parts not supplied or designated by the Manufacturer, or damages resulting from their use.
7. Electricity or fuel costs or increases in electricity or fuel costs from any reason whatsoever including additional or unusual use of supplemental electric heat.
8. ANY SPECIAL INDIRECT OR CONSEQUENTIAL PROPERTY OR COMMERCIAL DAMAGE OF ANY NATURE WHATSOEVER. Some states do not allow the exclusion of incidental or consequential damages, so the above may not apply to you.

This warranty gives you specific legal rights, and you may also have other rights which may vary from state to state.
